

Forced Air Rebates

FORCED AIR REBATES

Receive hundreds of dollars toward your forced air install.

Oftentimes homeowners are amenable to the idea of energy-efficient equipment that can save them money in the long term, but wary of the higher upfront cost. This delicate situation can work out in everyone's best interests thanks to a multitude of available rebates from Chicagoland utility companies. Designing a system to take advantage of these rebate opportunities can be taxing; you need to compare the equipment to which you have access with three different energy companies programs. Luckily, here at Able Distributors, we have designed several easy-to-digest resources that list qualifying systems and the values of the rebates that they can earn. Below is a quick rundown of the different ways you can upgrade your customer's comfort while saving them money:

Cooling Only

Gibson Complete System

Gibson Furnaces

Maytag Furnaces

Maytag 20 Seer Condensers

Maytag 16 Seer Condensers

Maytag 14 Seer Condensers
