

Chicagoland Steam Humidification by Honeywell

In the past, we've covered the difficulties surrounding steam humidification in the Chicagoland area. The low conductivity of Lake Michigan water means that standard, out-of-the box steam humidification options can struggle to produce the desired conditions. Previously, our only option was GeneralAire. Their products are still a great option, but now you have a second choice. Honeywell has released a new steam humidifier with a low-conductivity cylinder. To learn more about this new steam humidification solution, just keep reading!

NOTE: Steam humidification is one of the topics being covered at this month's Honeywell training classes. If you'd like to learn more, you can RSVP at <http://www.abledistributors.com/events>.

In the Box

- (1) Honeywell HM750 Steam Humidifier
- (1) Honeywell HumidPRO H6062 Digital Humidity Control
- (1) Honeywell HM750AYCL Pre-Salted Cylinder
- (1) Set of Duct Mounting Hardware
- (1) Set of Remote Mounting Hardware

Features & Advantages

There's a lot to love about the HM750 package. In addition to the unit itself and the low-conductivity cylinder, you also receive a control and two mounting options. The H6062 HumidPRO control is compatible with Honeywell smart thermostats and can be connected to Honeywell's Lyric or RedLINK smartphone apps. In addition to offering remote control, the HumidPRO can also be set to automatically adjust humidity levels and it features a Humidity Boost button for quick adjustments.

We already know that the HM750 comes with two mounting options but the biggest difference maker when it comes to ease of installation is probably the cabinet itself. Honeywell has successfully

fit a robust, low-conductivity steam humidifier into the smallest cabinet on the market: 17" H x 10" W x 7" D. With those dimensions, you'll be hard pressed to find a place that you can't install an HM750.

The HM750 can be run at either 120v or 240v depending on your humidification needs. It produces 11 GPD at 120v and 22 GPD at 240v. The HM750 also features push-in wiring terminals to simplify installation. Maintenance is just as easy thanks to the hinge-mounted cannister that can be quickly swapped out when the time comes.

The Competition

Below is a breakdown of how the HM750 compares to GeneralAire's options. All of these models will do a great job keeping your clients comfortable, so it comes down to preference. If price is the only thing that the homeowners cares about, the GenAire models are a great choice. If connectivity and convenience are a concern, the HM750 has a lot to offer. If you have any questions about how these units stack up, don't hesitate to ask your salesperson for some advice!

Company	
Honeywell	GENERALAire® Fresh Indoor Air Quality
Model	
HM750	DS15P DS25LC
Output	
11 GPD @ 120v 22 GPD @ 240v	DS15P - 15.84 GPD DS25LC - 25 to 35 GPD
Output Range	
On/Off	Modulating - 20% to 100% in 5% Increments
Voltage	
120v or 240v	DS15P - 120v DS25LC - 240v
Amperage	
12A Max	DS15P - 16.4A - 25A Dedicated Circuit DS25LC - 40A Dedicated Circuit
Dimensions	
17" x 10" x 7" (Smallest Footprint in the Market)	23-3/4" x 13-1/8" x 8-1/4"
Mounting	
Duct- or Remote-Mounted	Wall-Mounted
Mounting Kit	
Remote-Mount and Duct-Mount Included	Remote Blower Kit, Economy Duct Kit, and Deluxe Duct Kit Available as Separate Purchase
Interface	
LED Diagnostic Indicators	Digital LCD Screen with Comprehensive Information Display
Control	
HumidPRO H6062 Digital Humidity Control Included Compatible w/ Honeywell Smart Thermostats & Lyric App	Uses Standard Humidistat or Standard Thermostat w/ Humidistat
Cylinder	
HM750AYCL Cylinder - Pre-Salted for Lake Michigan Water	DS15P - 15-14 Cylinder for Low Conductivity Water DS25LC - 35-14 Cylinder for Low Conductivity Water
Warranty	
5-year	5-year
Notes	
Designed by Honeywell and Nortec	Five-year Track Record of Success in the Chicagoland Market
Field Support and Training from Honeywell	Backed by GeneralAire's Commitment to Contractors
Compatible with Honeywell's Connected Ecosystems RedLINK/Lyric	

If you want a hands-on look at the HM750 guided by a Honeywell professional, you're in luck. Steam humidification is on the agenda for this month's Honeywell training classes. You can RSVP right now at <http://www.abledistributors.com/events>.
