

NTI Dealer Training at Able

This month at Able we'll be hosting John McArthur, NTI's training manager, for three dealer training sessions. John has spent over two decades in the HVAC industry including stints in the contracting and wholesale sectors before coming on board at NTI. His experience and expertise is invaluable and we couldn't be more excited for him to share his knowledge with our contractors.

Joining John will be Kevin Booker, who will be discussing how Fernox improves water quality and helps systems run smoothly.

Full details for all three classes follow below. You can RSVP to each event at our [events page](#).

Dinner & beverages will be provided at each class! Space is limited so RSVP today!

McHenry Session

Able Distributors McHenry
4506 Hi-Point Road McHenry, IL 60050
Tuesday, January 16th, 2018 from 4:30pm until 7:30pm

Topics Covered:

- Introducing NTI and John McArthur
- Product introduction
- On de-techifying modern condensing boilers. (They really are much simpler than most technicians believe.)
- On product application and installation best practices. Covers piping, the importance of system water treatment, venting, etc.
- On control programming and features. Covers both the Sola and the Argus platforms.
- Fernox: The importance of water quality, how to test and treat water.

Evanston Session

Able Distributors Evanston

2423 Main Street, Evanston, IL 60202

Wednesday, January 17th, 2018 from 4:30pm until 7:30pm

Topics Covered:

- Sola control - basic, advanced, lead-lag, lead-lag DHW options for Tft condensing boilers and Lx-WH water heaters
- DHW considerations - tank performance, use of additional storage, mixing valves, boiler size vs tank size
- Sequence of operation in great detail (a crowd favorite!)
- Combustion fan operation and testing
- Combustion testing
- Fernox: The importance of water quality, how to test and treat water.

Chicago Session

Able Distributors Chicago

2501 N. Central Ave., Chicago, IL 60639

Thursday, January 18th, 2018 from 4:30pm until 7:30pm

Topics Covered:

- Sola control - basic, advanced, lead-lag, lead-lag DHW options for Tft condensing boilers and Lx-WH water heaters
- DHW considerations - tank performance, use of additional storage, mixing valves, boiler size vs tank size
- Sequence of operation in great detail (a crowd favorite!)
- Combustion fan operation and testing
- Combustion testing
- Fernox: The importance of water quality, how to test and treat water.

Remember, you can RSVP to each event at our events page.
