

This Month at Able, Join the Bosch Revolution!

Last year, Bosch revolutionized the inverter market with an 18 SEER, 56-decibel ultra-low energy heat pump that works with any standard thermostat. Nothing is easier to sell, nothing is easier to install, nothing is quieter, and nothing runs on less energy!

This year, we're helping you revolutionize your business with a traveling roadshow that gives you everything you need to start selling, installing, and loving Bosch heat pumps.

What to expect?

The Bosch Revolution Roadshow will be one-part technical training and one-part block party BBQ.

We will have:

- **Free refreshments including beer from Revolution brewery and lunch**
- Exclusive swag and discounts from Able and Bosch!
- Custom application diagrams for installing the Bosch Inverter Heat Pump
 - w/ Bosch Air Handler
 - w/ Bosch Coil
 - w/ standard or condensing furnace
 - w/ Unico mini-duct system
 - as 1st stage heat in a hydronic system
- Bosch's heat pump trailer parked and ready to provide a hands-on learning experience
- Industry professionals to answer any questions and provide guidance

When & Where

All Bosch Revolution Roadshow events start at 2:30pm

Thursday, May 10th - Able Distributors Chicago

Thursday, May 17th - Able Distributors South Side

Thursday, May 24th - Able Distributors Northshore

Thursday, May 31st - Able Distributors McHenry

Do you want a visit from the Bosch heat pump cart? Ask your salesperson how you can schedule an appearance at your business in May!
